EUNICE BUKOLA OGUNSHOLA

SOFTWARE QUALITY ASSURANCE ENGINEER
FCT, Nigeria • euniceogunshola@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Software engineer with 5+ years of experience in mobile app development and quality assurance on various projects, including fintech, e-Commerce, SaaS, and Web3. Unique blend of development and QA experience, where the latter means not just surface-level testing but full architectural context. Strong record of decreasing defects in production, leading API validation strategy on live banking platforms, and developing automation frameworks. ISTQB certified, driven by the desire to create software that works exactly as expected.

SKILLS SUMMARY

Programming Languages: Python, HTML/CSS, JavaScript, Dart/Flutter
Test Automation & Frameworks: Playwright, Cypress, Selenium, Appium
API & Performance Testing: Postman, Swagger, JMeter, Charles Proxy, Browser DevTools
Test Management: Jira, TestRail, MS Excel, Confluence
Database & SQL: MySQL, MS SQL
CI/CD & DevOps: Jenkins, GitLab CI, GitHub Actions, Git, Maven, Gradle, Docker
Core Competencies: Test Strategy & Quality Ownership, API & Web Automation Framework Design, CI/CD Test Integration (GitLab, Jenkins), Risk-Based & Exploratory Testing, Performance & Load Testing, Database Validation &Data Integrity Testing, Agile Delivery & Cross-Functional Leadership

WORK EXPERIENCE

Quality Assurance Engineer | **Laddar Africa** *Aug 2025 – Feb 2026*
Contract — Fintech & AdTech

Project: Fidelity Bank (Aug 2025 – Jan 2026)

- Led API validation strategy across two live banking platforms, ensuring transaction integrity and regulatory compliance before each production release.
- Designed and owned test cases covering 95% of critical user flows, establishing a reusable test suite that accelerated regression cycles across sprints in both Mobile and Web platforms.
- Architected test documentation standards in Jira and Excel, driving reduction in issue resolution time through structured, developer-ready bug reports.
- Partnered with project leads and engineering teams to proactively identify and resolve defects, contributing to measurable quality improvements across both platforms.

Project: Hoardings (Nov 2025 – Dec 2025)

- Spearheaded Smoke, Load, and Stress testing strategies using JMeter, validating platform stability under up to 3x normal traffic, ensuring production readiness for high-demand releases.
- Designed and executed test plans targeting business logic and financial transaction compliance across RESTful API endpoints.
- Drove end-to-end API coverage, ensuring full adherence to financial transaction standards and integration requirements.

Junior Product Manager / QA Engineer | **TechMosaic** *May 2025 – Jul 2025*
Contract — SaaS

- Owned end-to-end delivery of a company website project, aligning cross-functional teams around product requirements and release timelines.
- Established feature verification protocols against the PRD, achieving 100% coverage and eliminating post-launch rework through early misalignment detection.

QA Engineer (Intern) | **BrandDrive — Baobab 2023** *Jul 2024 – Jun 2025*
Full-Time Internship — Fintech

- Championed a QA process overhaul that drove a 60% reduction in production bugs over 6 months, an impact formally recognized by the CTO.
- Architected and maintained a suite of 40+ automated end-to-end test cases using Cypress, integrated into a GitHub Actions CI/CD pipeline, and cut manual regression time by ~50%.
- Led API and database validation using Postman and SQL queries, enabling faster root-cause analysis and consistent data integrity across sprints.
- Deployed browser DevTools diagnostics to accelerate defect resolution in collaboration with developers and project managers throughout the entire deployment cycle.

QA Engineer (NYSC Placement) | **Standard Biblio Service Limited** *Sep 2024 – Dec 2024*
Contract — EduTech

- Directed API and database testing across 3+ financial system modules using Postman, ensuring data integrity and accuracy across every release cycle.
- Designed and implemented comprehensive test plans, cases, and scripts in Jira, improving testing.
- Conducted structured exploratory testing across sprint cycles, maintaining rigorous defect documentation and retest standards.

Mobile App Developer | **Harmonic Studios & Jara Analytics** *April 2022 – Oct 2023*
Full-Time — E-Commerce / Web3

- Engineered cross-platform mobile applications using Dart/Flutter, translating Figma designs into polished, production-ready user interfaces.
- Integrated RESTful APIs to enable seamless client-server data exchange, contributing to robust and scalable Web3 and e-commerce product architecture.

EDUCATION

B.Eng in Computer Engineering — University of Uyo, Nigeria *Sep 2017 – Oct 2023*

CERTIFICATIONS

ISTQB® Certified Tester – Foundation Level (CTFL) — 2025
Foundational certification in software testing principles and best practices.
